#### Product Description:

Metal Brite is the most versatile metal polish on the market.

It is easily applied by hand or machine and works on aluminum, stainless, copper, silver, gold and other metal surfaces.

The product contains a blend of mild abrasives, chemical cleaners, and polymers. The abrasives and chemical cleaners remove oxidation, scratches, etc. from the metal and the polymers apply a smooth, shiny finish to the metal surfaces.

We recommend using it with a hand-held drill fitted with a Mothers PowerBall. That combination can clean and polish any metal including diamond plate, Alcoa big rig wheels, and pontoon boat pontoons.

#### Part Number:

- ◆ 16oz bottle # 22-622

#### Advantages:

- ◆ Easy on, Easy off formula
- ◆ Can be applied by hand or with a PowerBall
- ◆ Cleans and polishes in one easy step.
- ◆ Creates a high-shine, slick finish
- ◆ Low VOC Formula
- ◆ Polymers put a protective coating on metal to protect the surface from corrosion & oxidation.
- ◆ Protects the metal for months

#### Directions:

Surface should be cool to the touch before applying product.

1. Apply a thin layer of product onto the metal surface.
2. Buff surface by hand or with the Powerball. The surface will become black as oxidation, dirt and grime are removed from the surface.
3. Continue buffing until surface looks clean, smooth, and shiny.
4. Remove polish residue with a clean, dry microfiber cloth. Buff area to a high shine.
